25X1

1. [redacted] no progress was being made with the project of draining Lake Maliq because the drainage canal had been insufficiently sloped, thus making it impossible for the water level to be lowered. Consequently, local sugar beet cultivation had not begun as planned. The Maliq sugar plant, which employs about 500 workers, is therefore being furnished with raw material by other means.
2. Sheep in the Pranade area have been grouped by the authorities into aggregates of 5,000 heads. They are tended in sub-groups of 1,000. The shepherds are controlled by "vullnetar," usually 5 or 6 "vullnetar" for every 5,000 sheep.
